

REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-10-03	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Same trapezoid as the transom: 394 high, 988 to 1,099 wide.

One closes each half; the halves are separate boxes.

Sits on the bottom panel, between the sides, flush with the panel ends; glued and taped inside and out.

Drill the eight 11 bolt holes and two 12.5 pin holes through bulkhead and ring frame together, both halves clamped face to face, so the holes line up.
